

What resources is Lucid putting towards an energy storage business?

It's unclear what resources -- in terms of people and capital -- Lucid is putting towards an energy storage business. Such details are likely to remain scant until after the company officially becomes a publicly traded company.

Does Lucid have lithium-ion batteries?

Global leader in lithium-ion batteries, Panasonic Energy, has agreed to supply batteries for Lucid's full vehicle line-up, including the Lucid Air and upcoming Gravity SUV.

Can Lucid repurpose batteries from electric vehicles?

The company, which is already experimenting with energy storage systems for commercial and residential customers, is also eyeing ways to repurpose batteries from its electric vehicles. It's unclear what resources -- in terms of people and capital -- Lucid is putting towards an energy storage business.

How much does a Lucid battery cost?

When it starts deliveries, Lucid said it will have a record 146 MPGe and an EPA-estimated range of 420 miles. The Air Pure is Lucid's most affordable model starting at \$69,900. For the new model year, the battery was slightly reduced in size from 88 kWh to 84 kWh.

Why is Lucid Air so efficient?

This efficiency plays a direct and invaluable role in the Lucid Air's charging rate, determining the rate of mileage as distinct from the rate of energy flow. Furthermore, Lucid's unique and innovative "Wunderbox" onboard charging unit combines several usually separated functionalities into one package-efficient and structurally integrated housing.

Does Lucid have a 113 kWh battery?

It all comes down to the 113-kWh extended range battery pack Lucid has built with its in-house battery maker Atieva. 113-kWh indicates how much energy the battery can store, a higher capacity than those used in most other passenger EVs.

o Roughly 50% of Lucid's CO₂ emissions are from vented CO₂ resulting from Amine Treating o Capturing, sequestering and storage of vented CO₂ is the most economic option to capture ...
