

Are there Lynx in Belarus?

Behaviour and ecology of the Eurasian lynx. A case of study in Naliboki Forest and Paazierre Forest, Belarus
This scientific book gives the results of the long-term studies on the Eurasian lynx *Lynx lynx* in Belarus, mainly in Naliboki Forest and Paazierre Forest.

Why are Lynx rare in Ukraine and Belarus?

In Ukraine and Belarus, despite some protection, lynx were thought to be relatively rare due to poaching pressure and habitat degradation (Shkvyria & Shevchenko, 2009).

Are Lynx protected in Ukraine?

Unfortunately, current geopolitical realities reflect that international collaboration in the monitoring and management of lynx between other European nations and Belarus is now halted. Belarus also denounced the Bern Convention, under which lynx are protected, in August 2023. Concurrently, in Ukraine, it has been severely limited.

Do lynx live in Turkey?

The only densities higher than these were observed in Turkey: 4.20 individuals/100 km² (Avgan et al., 2014), where surveyed lynx, however, belong to a different subspecies (Caucasian lynx; *Lynx lynx dinniki*) mainly feeding on lagomorphs and thus having smaller home ranges.

Are Lynx protected in Europe?

In the European Union (EU), lynx are strictly protected under the Habitats Directive (Council Directive 92/43/EEC; EC, 1992), which aims to preserve important European biodiversity through connected conservation areas.

Are Eurasian lynx a carnivore?

Ecol Evol. 2023 Nov; 13 (11): e10688. The Eurasian lynx is a large carnivore widely distributed across Eurasia. However, our understanding of population status is heterogeneous across their range, with some populations isolated that are at risk of reduced genetic variation and a complete lack of information about others.

In Belarus there are three main types of habitat combinations that are mostly inhabited by a local population of lynxes. So, such a habitat combination should include not only suitable habitats for living of a lynx, but also it should have enough space for many lynxes, where there are sufficient carrying capacity, first of all, prey species i.e. food.
