

Warning: The information in this thread was obtained from various sources on the Internet, including any datasheets linked below, and is provided for reference only is not guaranteed to be accurate. To prevent fire or personal injury, never charge or discharge a cell before verifying the information yourself using the original specifications sheet provided by the ...

@daromer: I dunno, but my cells goes from 1900 to 2320 mAh, and many different brands, so i'm not sure if they would cohabit happily together, a bit like how human from different origin try to cohabit together, u know what i mean as a first pack, i would have like for the easy plug& play style @Korishan : thanks a lot, that's why i was afraid about without being sure ...

For those interested in IR and wanting to know what a "good" IR is for various cells I've put together the following table. This was built from a combination of Wolf, 100kWh Hunter, and my own data. All IR measurements were taken with a 4-wire Kelvin type AC 1kHz impedance tester, specifically...

18650 temperature. Thread starter allend83; Start date Feb 28, 2019; ALL NEW - Battery Finder Search for 12/24/36/48v or by capacity 1; 2; Next. 1 of 2 Go to page. Go. Next Last. A. ... There are some LGs that seem to hang on for dear life at that resistance but not enough.

I have two cells like these, marked "18650 7K41814 35037" and "18650 7K41814 35043" above the barcode, CJ beneath it. Both came from the same laptop battery pack that my cousin tore apart. Thanks for the info! I've been looking for a couple hours now.

And since you are new here, it may be tempting to buy some high capacity 18650's online for real cheap. Be aware, there are absolutely zero 18650, 25650, or similarly sized cells that are higher capacity than 3500-4000mAh. They are scams. And anything that has the word "Fire" in the name, take that as a warning not a name.

But the "Trustfire" in my DIY bluetooth speakerbox were a flop and my China batterie 18650 test - 508.800mAh in 62 cells showed that it's the same with other "brands". So I decided to go with used cells from major brands. I've done some researches on the internet where to get used 18650 batteries.

I building a 12V pack and I finish with all tests but last step is check self discharge of cell. Right now I charge all my cell to 95-100% or 4.10-4.20V. I mark each cell and I was wonder, how much voltage drop need to be that I need ot reject cell for pack. For example, voltage of cell is 4.16V...

I have a few hundred Headway LFP cells that I tested for capacity and IR. I want to make some 4S battery banks for car audio. I would like to make some different ah configurations probably from 16ah (2P) all the

way up to 96ah (12P), but for now let's assume I'd like to just make some 48ah...

So I have been trying to lower the voltage to below 5v for storage for scrap. It is really time consuming to Get below 0.3 v. ... 2xPCM60x | 100kWh LiFePo4 | 20kWh 14s 18650 | 66*260W Poly | ABB S3 and S5 Trip breakers ... of above posts says, the cell will be discharged to zero then rebounds when load removed By cycle i mean to apply load a ...

Soldering iron: 70W Taiyo Electric PX-401, set to ~390C, with 5mm diameter "large tip for high thermal-storage", but cut at an angle to allow pointed contact. Solder: Standard 60/40 rosin core, 1mm diameter ... Sub-Certified 18650 Cell Reclamation Technician Current equipment: APC Smart-UPS 3000 SmartUPS (rack mount)

Used 18650 battery cells. Clean, rewrapped, tested and ready to be spotwelded into a battery pack. You can place your order on our website: Direct product links: Samsung INR18650-30Q Samsung INR18650-25R Sony 18650 VTC5 Note: Minimum order quantity is 100pcs FREE...

I've actually had good success bringing 0v cells back to life. I first started by paralleling a good with a bad for 20 seconds, then on the D4. ... End game is to feed 100% of house solar to the grid and use second system for household usage with the added benefit of having power during outages. I'll have to look at grid backup and battery ...

Samsung ICR 18650 26D Panasonic CGR18650E The Samsung cells I have had very good success rate, most are testing to be over 2500mah, so practically new. The panasonic cells come in second. Their cells have tested every single time to be above 2000mah per cell, with none going below that. The sanyo cells come in third.

So I have been collecting, stripping, cleaning, charging, storing and testing 18650's till all I see when I close my eyes is 18650's My plan is to build 2 x 7S80P (>1800mah per cell)banks and hook them up to my Axpert 3KVA inveter and replace my 6 x 100ah lead acid's. Here are a few pic's of...
