

What is a C5 6 heated holding cabinet?

Stainless steel construction with foamed-in-place... C5 6 Series Heated Holding Cabinets provide control of temperature for safe and hot food. Temperature is displayed on an "always-on" analog thermometer for continuous monitoring of the cabinet...

What is a heated holding cabinet?

The main purpose of a heated holding cabinet is to maintain a product at safe serving temperatures, varying from short-term staging to prolonged periods, while also maintaining a "just-cooked" quality.

What is a Metro Heated Holding Cabinet?

Metro Heated Holding Cabinets are for hot food holding applications only. They have stainless steel construction and 2.5" thick, high-density fiberglass insulation to minimize temperature loss. An integral water pan system can be used to add humidity to the cabinet environment, improving food quality.

What brands of insulated garage storage cabinets are available?

Browse through our wide selection of brands, like WFX Utility(TM) and Dotted Line(TM). If you aren't finding the perfect product in the results for your current search for insulated heated garage storage cabinets, you can try searching again or using the Department navigation on the top of the page.

What is the difference between a mtu-12 and a passive moisture cabinet?

However, there is minimal control compared to the two cabinet styles discussed next. Passive Moisture Cabinets - These cabinets, such as FWE's MTU-12, provide moisture to the heated air circulating within. This will prevent food from drying out when using it to hold food for slightly extended time periods.

Should I get a climate controlled storage unit?

You should consider getting a climate controlled storage unit if you have items you'd like to protect from the weather and humidity. Non-climate rooms are perfect for items that you would store in your basement, garage or shed.
