

What will esogip do for Madagascar?

The ESOGIP will aid Madagascar's government to decrease energy loss, increase energy efficiency, raise the ratio of renewables in the domestic energy mix, develop its governance of the energy sector, and improve operational performance of Jirama, Madagascar's state-owned electric utility and water services company.

Where is energy most used in Madagascar?

These statistical analyses show that energy is most used in the residential sector in Madagascar. These results are in agreement with those found by Kameni et al. [2].Globally, in Sub-Saharan Africa, and similarly in many countries in Asia and Europe, a good quantity of energy is consumed in the residential sectors and in the industrial sector.

What is the energy sector policy in Madagascar?

Flowchart of the energy sector policy in Madagascar. As shown in Fig. 1,the energy sector policy is divided in two main strategies,namely: the institutional reform and public-private partnership.

Why does Madagascar have a low rate of electricity?

Only less than 1% of this demand is supplied by other renewable energy sources. This high share of wood energy is explained by its accessibility and its low cost for the population. Madagascar has a low rate electricity access due to its high price and the insufficient quantity production. The national rate of electrification is only 4.7% only.

Which energy process is available in Madagascar?

As no energy processfor Madagascar is available,we considered the generic ones,for fuel oil steam turbine and diesel combustible engine and hydrodam power plant. Reflecting Malagasy conditions and the efficiencies,transport of raw materials have been included in the process.

What is the rate of electrification in Madagascar?

The national rate of electrification is only 4.7%only. In urban zones,such as Antananarivo,this value could reach up. In view of the geographic and climatic conditions in Madagascar,the reality of development of renewable energy technologies (RETs) is complicated despite numerous research works carried out in this area.
