

What is the main energy source in Maldives?

In Maldives, the main energy source is imported fossil fuel (99.9%), with the bulk being diesel. This fuel is used primarily for electricity production and transportation.

Who is Varus energy?

Since 2014, Varus Energy GmbH has been committed to meeting the needs of our partners and customers for high-quality photovoltaic products. Our service includes container delivery at the best market prices as well as pre-commissioned systems delivered directly to the construction site. We also offer pick-ups for our partners.

What is the primary energy conversion in Maldives?

In Maldives, the primary energy conversion is from diesel energy to electricity. Nearly 100% of all electricity produced in Maldives comes from diesel-based systems. The generation and distribution of electrical systems are decentralized, with each separate island operating a self-sustaining diesel power generation and distribution system.

Does Maldives have an electrical power system?

All power systems and electrical installations in Maldives must comply with the regulations of the Maldives Energy Authority. No interconnection between the islands exists as of today. Both public utility companies (FENAKA and STELCO) are owned by the Ministry of Finance.

How much tCO₂ does Maldives emit per year?

Maldives, aiming for low carbon development, emits over 80% of its total emissions from energy use. During this period, the emission from energy use has been increasing at a rate of about 6-8% per year. This results in an annual emission of 75,527 tCO₂ from the energy sector alone.

What is the main economic activity in the Maldives?

The primary economic activity in the Maldives is fisheries. It is an extremely energy intensive sector involving transport and various manufacturing and industrial processes, contributing significantly to the energy consumption of the sector.
