

What is the China Energy Map?

The China Energy Map offers a comprehensive, interactive visualization of key energy infrastructure across China. Since its initial launch as the Baker Institute China Oil Map in February 2019, the map has undergone significant development and continues to expand.

Does the China Energy Map show EV battery manufacturers?

Data displayed on the China Energy Map has been confirmed with multiple sources before mapping. Specifically, with the difficulties of tracking individual EV battery manufacturers, we verified each EVB facility with recent job postings in addition to company websites/lookup pages.

How many layers are there in China's Energy System?

Since July 2020, it now features 13 additional layers, including natural gas infrastructure, coal, nuclear, wind, solar power plants, hydrogen infrastructure, carbon capture projects, mining operations, and electric vehicle (EV) battery factories, providing a more complete picture of China's energy system.
