

Why is battery energy storage system being introduced in Mauritius?

In view of the increasing share of the Variable Renewable Energy (VRE) in the energy mix of Mauritius, the CEB has planned for the introduction of Battery Energy Storage System on its network to arrest the fluctuation inherent to the VRE systems. The Mauritian energy transition to a low carbon economy is picking up speed.

How will Mauritius transition to a low carbon economy?

The Mauritian energy transition to a low carbon economy is picking up speed. The CEB has installed the first grid-scale Battery Energy Storage System (BESS), the first in its kind in Mauritius, to enable high capacity storage of renewable energy in the grid.

What is Mauritius' long term energy strategy?

This is in line with the Government of Mauritius' Long Term Energy Strategy 2009-2025 to increase the share of renewable energy in our energy mix (electricity production, transportation sector and manufacturing) to 35% by, namely, reducing the country's dependence on coal and heavy oil for electricity generation.

Does Qair Group operate solar energy farms in Mauritius?

Qair Group already operates three solar PV and wind energy farms in Mauritius with a combined capacity of 35 MW. The group founded by Jean-Marc Bouchet has a combined renewable energy capacity of 860 MW operational in Africa, South-East Asia, South America, and Europe.

Why is Mauritius facing a rise in fossil fuels?

The country, located off the coast of East Africa, is facing a rise in fossil fuels due to the current energy crisis. Qair Group already operates three solar PV and wind energy farms in Mauritius with a combined capacity of 35 MW.

The 14 MW Grid-Scale Battery Energy Storage System (BESS), spread over four Central Electricity Board (CEB) sub-stations namely La Tour Koenig (2MW), Anahita (4MW), Wooton (4MW) and Jin Fei (4MW), was ...

This high-tech, latest technology and ultra-fast response battery energy storage system (BESS) is the first of a series of upgrades to the electricity grid in order to achieve a smarter, more modern and cleaner electricity network in Mauritius.

The BESS resources are aimed at enabling Mauritius to reach its energy policy goals, including a target of sourcing 60% of its electricity from renewables by 2030 and reducing greenhouse gas (GHG) emissions 40% and ...

The four Stor"Sun solar plants located in Trou d'Eau Douce (SS1 and SS2), Balacava (SS3) and Petite-Riviere (SS4) will integrate large scale Battery Energy Storage Systems (BESS) to provide a clean and firm ...

The 20 MW BESS, to the tune of Rs 700 million, was supplied, installed and commissioned by SIEMENS France, a world leader in industrial electrical and electronic systems including utility-scale battery storage.
