

Minimum space between self-cooling upper cabinet

How much space is needed between cabinets? 42" is nice, but 36" is minimum passing and still works perfectly functionally. Do base cabinets go against the wall? Leave a ...

The standard distance between kitchen countertops and upper cabinets is 18 inches, but can stretch up to 22 inches. Most countertops extend 1 to 1.5 inches beyond the cabinet edge. It's ...

The space between the upper and lower cabinets is a key element in achieving this balance. Too much space can make the kitchen feel disjointed, while too little space can create a cramped ...
