

What is a small modular reactor?

Small modular reactors have a power output of less than 300 MWe. The term "modular" in the context of SMRs refers to its scalability and to the ability to fabricate major components of the nuclear steam supply system (NSSS) in a factory environment and then transported them to the site. Key characteristics:

Are small modular reactors a good investment?

As nuclear continues to gain interest as a dense, reliable, and clean source of heat and power, small modular reactors (SMRs) and other advanced nuclear technologies are among the solutions that can enable new use cases and strengthen the value proposition for investors.

Are small modular reactors disrupting conventional notions of nuclear power?

What is the NEA small modular reactor (SMR) dashboard?

"This second edition of the NEA Small Modular Reactor (SMR) Dashboard provides a snapshot of this critical moment in the evolution of nuclear energy.

Where is Poland's first small modular reactor based?

A newcomer in the nuclear technology market, Poland chose Portland, Oregon-based NuScale to develop and construct the country's first small modular reactor. The historic agreement comes on the heels of an ambitious multi-nation decarbonization plan signed in Glasgow last November by 28 new members of the Powering Past Coal Alliance (PPCA).

Could Chevron play a role in small modular nuclear reactors?

Chevron CEO Mike Wirth said he's a fan of small modular nuclear reactors and suggested there could be a role for the Fortune 500 company to play in the future. Chevron CEO Mike Wirth sees promise in small modular nuclear reactors, which have become popular in the tech sector recently, and signaled openness to getting involved more directly.

The Westinghouse AP300 SMR delivers on the promises of small modular reactors: smaller scale, modular construction for efficient build schedules, state-of-the-art safety and reliability. The benefits of basing AP300 on the proven ...

Welcoming the selection, Sean Sexstone, executive vice-president for advanced nuclear at GE Hitachi, said its BWRX-300 small-modular reactors was a "simplified, safer and ...
