Gr&#226;ce &#224; notre expertise locale, depuis 2001 nous ...

Ultrason is the inventor of modern non-contact ultrasound and a leading innovator in the development of transducers, systems and services for advanced materials testing and characterization. For 25 years we have been building unique ultrasonic devices targeted towards cost-effective production, saving our customers time and energy. We translate our advanced ...

Le Centre d'Imagerie M&#233;dicale de Monaco est un cabinet de radiologie o&#249; une &#233;quipe de professionnels vous accueille tous les jours du lundi au samedi midi. Besoin d'un examen IRM, d'un scanner, d'un panoramique dentaire, d'une radiographie, d'une &#233;chographie ou d'une mammographie 3D?

Mid to high frequency transducers designed for conventional direct contact non-destructive testing applications. W-series built with lead metaniobate piezoelectric material for high bandwidth and K-series built with high performance PZT for high sensitivity.

Point focused transducers for smaller beam profile at focal length, providing greater spatial resolution and higher energy intensity. Transducer enclosure identical to circular non-contact series of corresponding active

diameter.

Email: [info@ultragroup](mailto:info@ultragroup) Web: INTRODUCTION Non-Contact Ultrasound (NCU) is highly desirable for testing and analyzing early stage materials formation (green ceramics, powder metals, elastomers, composite pre-pregs, etc.), and for contact and liquid-sensitive materials (porous materials, food, pharmaceutical and ...
