

What is draconic evolution energy core?

The Energy Core is a machine added by Draconic Evolution energy storage system. It is the central part of the Energy Core multiblock which can store massive amounts of Redstone Flux (RF). This...

Should draconic evolution power storage get bigger?

Draconic evolution power storage is cool and all but I think it should get bigger as it charges up. There's no difference when it's full so might as well build it for looks and leave it unpowered.. I just don't see the point of storing that much power anyway.

How much power does a draconic energy cube reactor make?

The reactor kicks on when I need a big boost of power to fill my Tier 4 Draconic Energy Cube. It makes about 28k RF/t with 13 fuel rods. Eventually, I'll expand to turbines on my reactor. I'm using solar panels from environmental tech but they can't quite keep up.

I haven't used the Draconic energy core yet, but I'm a little hesitant on building one because I'm playing on a public server with no way to rollback. I realize this is only an energy storage ...

So, I've built a Tier 4 Energy Storage multiblock today. Everything worked fine and it's charging like it's supposed to. To the problem. I left it to charge a bit while doing other stuff in my base. ...

Make sure that the pylons are connected to the core (the tiny white particles), that the blue orb on the pylon is pulsing outward (input to the core), and that you use some sort of duct/conduit to ...

It's basically a gigantic battery for your various devices. The best tools and armor in Draconic Evolution will require millions of RF to fully charge each, and it's nice to be able to ...
