

What are Morocco's energy policy initiatives?

Beyond the advancement of renewable energy, Morocco's policy initiatives encompass energy efficiency measures in challenging-to-abate sectors, such as building insulation and the adoption of energy-saving light bulbs. The overarching objective is to achieve a 20% reduction in overall energy consumption by 2030.

Who is responsible for electricity storage in Morocco?

Electricity storage in Morocco falls within the scope of competence of the Ministry of Energy, Mines, Water and Environment. ONEE is in charge of the production, the transmission and the distribution of electricity.

How is energy storage defined in Morocco?

Electricity storage is not separately defined in the Moroccan legislative framework. The rules concerning the issue of energy storage are to be found in the law applicable to the production of electricity.

How to ensure a climate-resilient energy transition in Morocco?

To ensure a climate-resilient energy transition in Morocco, establishing a dedicated sectoral plan for the energy sector will be the first step.

What are the challenges faced by electricity storage in Morocco?

Electricity storage is still at a development stage in Morocco and therefore faces the following challenges: Lack of a specific legislation regulating electricity storage- the question of storage will be dealt on a case by case basis.

Can Morocco transition from fossil fuels to reduce energy dependence?

These studies have been detailed in prior publications. Morocco is confronted with a crucial decision concerning the composition of its future electricity generation: how to transition from fossil fuel production to diminish energy dependence.

Fig 2: Morocco's primary energy demand in Millions TEP [25]. In 2018, Morocco installed 34% of renewable energy (i.e. 3,700 MW), divided as follows: 1,770 MW, 1,220 MW and 711 MW ...

Morocco is currently aiming for 52% of its installed capacity to be renewables by 2030. It held a 400MW solar PV tender last year, with other government-backed PV projects ...
