

What are Morocco's energy policy initiatives?

Beyond the advancement of renewable energy, Morocco's policy initiatives encompass energy efficiency measures in challenging-to-abate sectors, such as building insulation and the adoption of energy-saving light bulbs. The overarching objective is to achieve a 20% reduction in overall energy consumption by 2030.

What is the Moroccan energy sector doing about variable renewables?

The national electricity supplier and grid operator, as well as other actors in the Moroccan energy sector, are developing solutions and improving skills to enable the electricity system to account for a larger share of variable renewables. The project operates in the following areas of action:

Is Morocco a driver of green and competitive energy?

With the new development model published in June 2021, Morocco also wants to position itself as a driver of green and competitive energy. In view of this, the country is implementing ambitious projects to expand renewable energy sources.

Will Morocco replace coal power plants with natural gas power plants?

Morocco's strategic initiative to replace coal power plants with natural gas combined-cycle power plants emerges as a potential solution to enhance power system resilience against water stress. The national plan aims to install an additional 2,400 MW of natural gas power plant capacity by 2030 and completely phase out coal-fired plants by 2050.

Can Morocco export solar energy to Europe?

Private Moroccan firms like Gaia Energy are planning to export solar and wind-generated electricity to Europe. Gaia Energy is developing wind and solar schemes that could meet up to 4% of Germany and Italy's electricity needs. Mr Zniber adds that this is just the beginning and more renewable energy exports to Europe from Morocco are planned.

Is green industrial manufacturing a viable option in Morocco?

Green industrial manufacturing driven by renewable energy has significant potential to hire individuals with low levels of education in urban areas, provided they are able to acquire technical vocational training through an appropriate expansion of Morocco's training ecosystem in coordination with the needs of the country's green energy ecosystem.
