

This article proposes a generic multifunctional control strategy for battery energy storage system (BESS), aiming at achieving multiple objectives, such as, controlling the ...

450kg Battery . 780kg Structure/Systems ... provide energy storage . Multifunctional. save system mass and volume . Hybrid/ electric vehicles Aerospace . Portable electronics Military ...

Structural batteries are multi-functional composites that combine the functions of energy storage and mechanical load support. Bipolar current collectors allow batteries to be ...

Thomas et al. [8] suggest that 50 Wh/L is a reasonable target energy density for multifunctional sandwich composites. The results in Fig. 13 indicate that the specific flexural ...

The as-assembled ZnS battery offers a high energy density of 283 Wh/kg based on the CNF-S cathode (149 Wh/kg based on the ZnS cell) and mechanical properties beyond state-of-the-art structural energy storage ...

Herein, a structural battery composite with unprecedented multifunctional performance is demonstrated, featuring an energy density of 24 Wh kg<sup>-1</sup> and an elastic modulus of 25 GPa and tensile strength exceeding ...

A novel concept of energy storage is presented involving ion-dipole complexation within multifunctional polymer electrolyte membrane (PEM), consisting of polyethylene glycol ...

1 Introduction. To catch up with the faster pace and higher quality demand in modern life, flexible, wearable, and multifunctional electronic devices are gaining increasing attention and have become a hot spot in the market of digital ...

1 Introduction. To catch up with the faster pace and higher quality demand in modern life, flexible, wearable, and multifunctional electronic devices are gaining increasing attention and have ...

The integrated structural batteries utilize a variety of multifunctional composite materials for electrodes, electrolytes, and separators to improve energy storage performance and ...

It should be pointed out that specific capacities of the present cathode are slightly higher than those (i.e., about 140-120 mAh/g) of a conventional liquid electrolyte lithium ion ...

The structural battery is a multifunctional energy storage device that aims to address the weight and volume efficiency issues that conventional batteries face, especially in electric ...
