As gas and electricity prices rise, an increasing number of people are turning to solar panels to try to cut costs. The question then arises - how can I do this most tax-efficiently? For owners of a limited company, there are three main options to make this investment. Option 1: Take an additional dividend and purchase the solar panels privately

How many solar panels do I need to power my home? The average home requires a 7 kW solar system which is 20 x 350-watt panels. However, this varies a lot by state and the amount of electricity you use. The estimator will tell you how many solar panels you need to power your home based on your location and the amount you spend on electricity.
