

What is a photovoltaic project in Timor-Leste?

Just as the remaining renewable energies sources that are being explored by the Government in Timor-Leste, the photovoltaic units (or solar project) implementation project is specially directed for the families that live in remote areas, where difficulties still exist in the national energy network installation.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

Does Timor-Leste have a demand for solar?

3 MDF survey on understanding demand for solar in Dili, Timor-Leste. Timor-Leste's rooftop PV solar industry is new and undeveloped. Limited availability of maintenance and spare parts inhibits some businesses from switching to solar.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Why did Timor - Leste invest in solar photovoltaics?

According to Silva, the government's purpose was to invest in Solar Photovoltaics (PV) because it can help Timor - Leste save the cost of fuel which will be filled with generators in Hera and Betano. "Every year the Government pays \$126 million for the fuel which will be filled in the generator," he said.

Leste. Timor-Leste is a lower middle-income country with a population of 1.2 million and a landmass size of 15,410 km². The country belongs to the Small Island Developing States group. Timor-Leste emerged from a history of colonial rule and foreign occupation through a short but devastating period of civil unrest and conflict.

As of 2023, Timor-Leste has not yet established any significant solar panel production capacity. 2 However, a notable installation includes the 300 kWp solar system at the UN House in Dili, which covers 75% of the daytime electricity ...

DILI, 24 march 2023 (TATOLI) --Over 70 international and local companies have submitted the requirement for the Solar Photovoltaics (PV) project tender in the municipality of Manatuto, Sub administrative of Laleia. EDTL held a pre-bid ...

2 ???· Through the Pacific Green Transformation Project (PGTP), the Japanese government has

partnered with the United Nations Development Program (UNDP) to install solar panels ...

From 2003 to 2021, Renew worked with communities in Timor-Leste to provide clean, renewable lighting and electricity. We helped install solar lighting and power to more than 2,000 homes and over 100 community centres, orphanages, schools and hospitals in remote rural villages. We also helped train 180 village-based solar technicians.
