

What is Mysol grid?

Since then, MySol Grid is developing its activities in Sub-Sahara Africa with the ambition to give access to energy to millions of people in Africa. As ENGIE Energy Access we are proudly combining mini-grids with modular solar home systems as a unique, integrated business offering.

What is Engie energy access's 'Mysol' project?

MySol, an initiative by ENGIE Energy Access, will distribute battery-charged solar home systems to provide lighting in homes currently using fossil fuel-based lamps, resulting in household energy savings and a reduction of harmful kerosene fumes. Carbon financing will also be used to scale up the project to supply systems to remote areas.

Why should you choose Mysol?

More than 9 million people have benefited from increased health and prosperity thanks to our solar energy solutions. With MySol, we offer the widest range of PAYGo solar home systems throughout Africa and our certified and quality assured kits have been proven in the field since 2011.

What is Mysol?

MySol is the new brand name that will replace what is known today as Fenix and Mobisol. Following the integration of Fenix International, Mobisol and ENGIE PowerCorner to form ENGIE Energy Access, we are creating an expanded product range by combining Fenix and Mobisol products.

What is Mysol boss?

We are proudly introducing our revolutionary Solar Business System, MySol Boss! The MySol Boss is all-in-one standalone solar energy system of 3kW, 5kW or 8kW capacity. Our tailor-made green energy solution tackles the energy obstacles faced by households, institutions, and small businesses lacking grid access or those dependent on generators.

What is Mysol grid doing in 2021?

Over the course of 2019 to 2021, MySol Grid was taking part in a study conducted by the Energy2Equal program by IFC that aims to expand women's access to jobs, leadership positions, and entrepreneurial opportunities in corporate value chains within the renewable energy space.

In 1936, a colonization program began to settle Americans on Baker, Howland, and Jarvis. Still, all three islands were evacuated in 1942 due to World War II. [1] [2] ISO introduced the term "United States Minor Outlying Islands" in 1986. ...
