U.S. jobs like Solar Technician will grow by 27% through 2031. The U.S. solar industry is projected to grow at a CAGR of 17.3% through 2027.

Do small islands need a lot of space?

Shah of the University of Delaware points out that while a lack of space is often cited as a constraint for installing renewables on small islands, the efficiency of both solar and wind energy has improved markedly over the last decade, meaning less space is needed. Meanwhile, islands are exploring technologies to harness energy at sea.

Could geothermal power power a small island?

While most small islands will have to rely on intermittent solar or wind power, others are blessed with significant geothermal or hydroelectric potential that could provide a baseload electricity supply, and could conceivably follow the paths of Iceland and New Zealand.

Why do Islands use geothermal energy?

Indeed, islands have often been at the forefront of innovation in energy systems as they seek to reduce their dependence on expensive imported fossil fuels. Iceland and New Zealand, for example, were among the first countries to make use of geothermal energy on a large scale.

Can 'Island laboratories' help solve the green energy problem?

But as SIDS find solutions to their green energy conundrum, 'island laboratories' may just be able to generate some valuable lessons for the rest of the world to heed. This article is part of The Ethical Corporation's Decarbonising Industries series, which is being published over the course of this month.

Is SunPower a good solar company?

SunPower is proud of its longstanding history in the industry. As they state, "We're the only U.S.-based solar company that's been around longer than our 25-year warranty." Headquartered in Silicon Valley, California, this company has received more than 1,000 patents for solar innovations.
