

What is Nandu power supply business model?

It is understood that nandu power supply adopts the business model of "investment +operation". In recent years,it has been constantly promoting the progress of its energy storage business and continuously obtaining multiple energy storage orders to boost its business growth.

What drives the growth of Nandu power supply lithium battery business?

In terms of segmentation,lithium battery communication energy storage is the main force driving the growth of nandu power supply lithium battery business. In 2017,the revenue of lithium battery communication reached 444 million yuan,up by 80.86% year on year.

How did Nandu power supply perform in 2017?

Nandu power supply's 2017 annual report shows that during the reporting period,the company achieved a revenue of 8.637 billion yuan,up 20.94% year on year,and the net profit attributable to shareholders of the listed company was 418 million yuan,up 15.65% year on year. Among them,lithium battery products achieved revenue of 504 million yuan.

How much money did Nandu power supply lithium battery make in 2017?

In 2017,nandu power supply lithium battery products achieved revenue of 504 million yuan,while communication lithium battery products achieved revenue of 444 million yuan,a year-on-year increase of 80.86%,mainly concentrated in overseas markets.

What is the power capacity of energy storage systems?

The power capability of these energy storage systems ranges from 100 kW to several megawatts(MW),and the energy storage capabilities range from hundreds of kilowatt-hours to tens of megawatt-hours . LABs have undergone long-term technological evolution in large-scale energy storage applications.

What is a lead battery energy storage system?

A lead battery energy storage system was developed by Xtreme Power Inc. An energy storage system of ultrabatteries is installed at Lyon Station Pennsylvania for frequency-regulation applications (Fig. 14 d). This system has a total power capability of 36 MW with a 3 MW power that can be exchanged during input or output.
