

What is the National Energy Storage Summit?

On March 8 and 9, Berkeley Lab is hosting the National Energy Storage Summit, a virtual public event that will connect thought leaders across industry, government, communities, and the research enterprise to catalyze partnerships and accelerate solutions around specific challenges to America's energy storage future.

What happened at the National Energy Storage Summit 2022?

Published on April 28, 2022 by Ruby Barcklay. 1,520 attendees. 104 speakers. Live endorsement by the Secretary of Energy. A livestream from space. By all measures, the National Energy Storage Summit, led by Berkeley Lab on March 8-9, was a resounding success. Such an endeavor was the work of many hands over many months.

What is the energy storage center?

The Energy Storage Center brings together more than 100 Berkeley Lab researchers to conduct pioneering work across the entire energy storage landscape, from discovery science to applied research, deployment, analysis, and policy research.

Why is energy storage important?

Energy storage is critical in the fight against climate change. It's a major area of focus for the Department of Energy (DOE) because of its importance as a solution for energy-efficient transportation, buildings, industry, the evolving grid, and resilience.

Why is exponential energy storage important?

Exponential energy storage deployment is both expected and needed in the coming decades, enabling our nation's just transition to a clean, affordable, and resilient energy future.

Exponential energy storage deployment is both expected and needed in the coming decades. To that end, the U.S. Department of Energy's Lawrence Berkeley National Laboratory (Berkeley ...

On March 8 and 9, Lawrence Berkeley National Laboratory (Berkeley Lab) is hosting the National Energy Storage Summit, a virtual public event that will connect thought leaders across industry, government, ...

This VIRTUAL public summit will convene and connect national and regional thought leaders across industry, government, communities, and the research enterprise to catalyze solutions and partnerships around specific ...

The report's focus is the role of the nuclear energy enterprise as a key enabler of these objectives; it is not about the nuclear enterprise per se. The report includes an appendix that ...

"Accelerating the science, technology, policy, and markets in the energy storage sector requires an all hands on deck approach," said No&#235;l Bakhtian, Executive Director of the Lab's Energy Storage Center.

Pacific Northwest National Laboratory (PNNL) conducts research for national security missions, nuclear materials stewardship, non-proliferation missions, the nuclear fuel life cycle, energy production. PNNL is engaged in ...

services (capacity, storage...), but little activity for valuing fuel diversity and "baseload" services. The national security imperatives of nuclear energy, however, are not addressed in state rate ...
