

What is Berkeley Lab's energy storage center?

Building on 70 years of scientific leadership in energy storage research, Berkeley Lab's Energy Storage Center harnesses the expertise and capabilities across the Lab to accelerate real-world solutions. We work with national lab, academic, and industry partners to enable the nation's transition to a clean, affordable, and resilient energy future.

What is NREL's energy storage research?

NREL's energy storage research spans a range of applications and technologies. NREL's electrochemical storage research ranges from materials discovery and development to advanced electrode design, cell evaluation, system design and development, engineering analysis, and lifetime analysis of secondary batteries.

What is the National Energy Storage Summit?

On March 8 and 9, Berkeley Lab is hosting the National Energy Storage Summit, a virtual public event that will connect thought leaders across industry, government, communities, and the research enterprise to catalyze partnerships and accelerate solutions around specific challenges to America's energy storage future.

What is the energy storage center?

The Energy Storage Center brings together more than 100 Berkeley Lab researchers to conduct pioneering work across the entire energy storage landscape, from discovery science to applied research, deployment, analysis, and policy research.

What is accelerated energy storage discovery-to-deployment for decarbonization?

The March 9 session, entitled Driving Accelerated Energy Storage Discovery-to-Deployment for Decarbonization, will expand the annual Bay Area Battery Summit ecosystem to a national stage, in partnership with New Energy Nexus, SLAC National Accelerator Lab, and Lawrence Livermore National Lab.

What is the Energy Storage Research Alliance (Esra)?

The Energy Storage Research Alliance will focus on advancing battery technology to help the U.S. achieve a clean and secure energy future. Berkeley Lab's contributions to ESRA include world-leading energy storage research expertise and capabilities, such as the Advanced Light Source. Credit: Marilyn Sargent/Berkeley Lab

"Renewables in Latin America and the Caribbean" or RELAC is a regional initiative across Latin America and the Caribbean (LAC) that was created at the end of 2019, within the framework of ...

A brainchild of Lab Director Mike Witherell last spring, the intent was to reinforce Berkeley Lab's role as a serious national energy storage player, highlight the Lab's new Energy Storage Center which was established in the ...

Electrochemical energy storage. Materials discovery, synthesis, characterization, and diagnostics to develop next-generation batteries (including solid state) and flow batteries. ... A science-to ...

Argonne is recognized as a global leader in energy storage research. Our cutting-edge science has enabled electric vehicles to travel farther, electronic devices to last longer, and renewable ...

A new report by the National Renewable Energy Laboratory (NREL) examines the types of clean energy technologies and the scale and pace of deployment needed to achieve 100% clean electricity, or a net-zero power ...

California Battery Manufacturing Summit 2024. It's a wrap! In September, Berkeley Lab was honored to host the California Battery Manufacturing Summit 2024, co-organized with Lawrence Livermore National Laboratory and SLAC ...

The U.S. Department of Energy (DOE) announced its decision to renew the Joint Center for Energy Storage Research (JCESR), a DOE Energy Innovation Hub led by Argonne National Laboratory and focused on advancing ...

In the report, we emphasize that energy storage technologies must be described in terms of both their power (kilowatts [kW]) capacity and energy (kilowatt-hours [kWh]) capacity to assess their ...

NREL's Advanced Research on Integrated Energy Systems (ARIES) platform will support demonstration of large-scale hydrogen production, storage, and delivery systems and show how hydrogen can stabilize the future ...

We work with national lab, academic, and industry partners to enable the nation's transition to a clean, affordable, and resilient energy future. The Berkeley Lab Energy Storage Center is a world leader in advancing solutions that impact ...

On March 8 and 9, Berkeley Lab is hosting the National Energy Storage Summit, a virtual public event that will connect thought leaders across industry, government, communities, and the research enterprise to catalyze ...

- The U.S. Department of Energy (DOE) today announced the beginning of design and construction of the Grid Storage Launchpad (GSL), a \$75 million facility located at ...

NREL is developing high-performance, cost-effective, and safe energy storage systems to power the next generation of electric-drive vehicles. Researchers evaluate electrical and thermal performance of battery cells, modules, and ...

The National Renewable Energy Laboratory is a national laboratory of the U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, operated by the Alliance for Sustainable Energy LLC.
