

What is the 'guidance on accelerating the development of new energy storage'?

Since April 21, 2021, the National Development and Reform Commission and the National Energy Administration have issued the 'Guidance on Accelerating the Development of New Energy Storage (Draft for Solicitation of Comments)' (referred to as the 'Guidance'), which has given rise to the energy storage industry and even the energy industry.

What are the main goals of new energy storage development?

The main goals of new energy storage development include: Full market development by 2030. 1) Strengthening planning guidance to encourage the diversification of energy storage; 2) Promoting technological progress to expand the energy storage industry system; 3) Improving the policy mechanism to create a healthy market environment;

What is the 'guidance' for the energy storage industry?

Based on the above analysis, as the first comprehensive policy document for the energy storage industry during the '14th Five-Year Plan' period, the 'Guidance' provided reassurance for the development of the industry.

Will energy storage eliminate industrial development?

In the context of the 'dual-carbon' goal and energy transition, the energy storage industry's leapfrog development is the general trend and demand. The follow-up actions will inevitably introduce a series of policies for the development of energy storage to eliminate industrial development. Faced with 'obstacles' one by one.

Can China develop energy storage technology and industry development?

Under the direction of the national "Guiding Opinions on Promoting Energy Storage Technology and Industry Development" policy, the development of energy storage in China over the past five years has entered the fast track.

What is the importance of NDRC guidelines?

The guidelines will be of great significance to promote the green transition of the development model, comprehensively promote the construction of a beautiful China, and achieve high-quality development, according to the NDRC.

400MWh lithium iron phosphate (LFP) battery energy storage system (BESS) project in Ningxia, China. Image: Hithium. On May 14th, China's National Development and Reform Commission (NDRC) and the National ...

According to the statistics of the database from China Energy Storage Alliance, the cumulative installed capacity of new electric energy storage (including electrochemical energy storage, compressed air, flywheel,

super ...

On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main goals of new energy ...
