

What happened in Escondido?

While no one has been injured by the fire -- which may take up to 48 hours to burn itself out -- evacuation orders remain in place in the largely industrial part of the city. Fires like the one in Escondido have caused some groups to become wary of the large battery storage facilities.

Will SDG&E put a pause on battery storage facilities in Escondido?

After last week's lithium battery fire at an SDG&E battery storage facility in Escondido, the Board of Supervisors will consider putting a pause on future such facilities.

Could a moratorium freeze AES' Seguro storage project in Escondido?

Should the supervisors elect the moratorium route, it could freeze the proposed AES' Seguro storage project in Escondido, not far from where Thursday's fire took place. This project would be capable of storing up to 320 megawatts or 1,280 megawatt hours worth of energy -- several times larger than the facility where the fire continues to burn.

Did Escondido fire cause evacuation orders?

Update: Evacuation orders were lifted Saturday after the battery fire was out. "Over the coming weeks, the Escondido Fire Department and SDG&E will conduct a thorough investigation to determine the cause of the fire," officials from the city of Escondido said in a statement.

Where is the Escondido battery fire?

"The Escondido battery fire is unfolding in an industrial area away from homes and residences.

Are Bess fires on the radar?

Globally, BESS fires are on the radar. The Electric Power Research Institute (EPRI), an independent, non-profit energy research, development, and deployment organization with subsidiaries in Europe, the Middle East and Africa, has developed and maintained a battery energy storage system failure event database.

SDG& E's 30MW lithium-ion BESS at Escondido, the largest in the world when it launched in 2017. Image: SDG& E. Investor-owned utility SDG& E is turning its first lithium iron phosphate-based battery energy storage system (BESS) online today, while Stanford university says it has hit 100% renewable electricity with the offtake from Goldman Sachs" recently ...

The government of New Caledonia, a French overseas territory in Polynesia, has announced plans for a 150MWh battery energy storage system (BESS) to be deployed by IPP Akuo Energy. Authorities have enlisted Akuo, a developer and independent power producer (IPP), to deploy the system which will have a discharge duration of three hours, a state ...

The industry acknowledges risk; it is part of the profit equation. According to the Energy Power Research Institute (EPRI), the industry's research group, at least 90 lithium-ion BESS facility fires have occurred since the first facilities first came online with about most occurring in the past 3 years is a relatively nascent industry and "risk" is a part of the profit ...

The SDG& E-owned energy storage arrays will help to improve regional reliability and integrate greater amounts of renewable energy when operational by the end of January 2017. Located at SDG& E substations in Escondido and El Cajon, the Advancion energy storage arrays will provide 37.5 MW of power and serve as a 75 MW flexible resource to the grid.

The resolution argues that BESS projects do not provide "realistic economic benefits to the city" and could pose health and safety risks, decrease residential land values, discourage employers ...

These beach resorts in New Caledonia have great views and are well-liked by travelers: Chateau Royal Beach Resort And Spa - Traveler rating: 4.5/5. Doubletree By Hilton Noumea Ilot Maitre Resort - Traveler rating: 4/5.
