

The successful development was the catalyst for future BESS projects, including the next site delivered, Contego (Burgess Hill). These sites were the leading performing BESS assets in 2021 and 2022 in the UK. Both sites were the first in the UK to utilise 2-hour duration systems. ... Harmony has teams in France, Poland, Germany and New Zealand ...

The BESS is the first stage of a project that will include the building of a 130MW solar farm by Meridian, sharing the same location at Ruak?k? in the country's North Island. The BESS will include 80 Intensium ...

LONDON, November 27, 2024 - JLL's Energy and Infrastructure Advisory team acted as exclusive sell-side M& A advisor to Clearstone Energy, a leading renewable energy project developer. The advisory was for the sale of a 200MW / 800MWh, transmission connected battery energy storage system (BESS) in the UK.

New Zealand's transition to a renewable energy future has taken a significant step forward with the nation's first grid-scale battery energy storage project now offering injectable reserves...

Harmony Energy has announced the successful sale of its 100MW Marronniers BESS project to leading Swiss energy services provider, Alpiq. This important transaction underscores Harmony Energy's strategic focus on expanding its footprint within the French energy market by leveraging proceeds to reinforce its platform for future BESS and solar developments and operations.

EIG launches new BESS developer with 3GW BESS pipeline. Elsewhere in the UK BESS market, institutional energy investment firm ... Scotland, aims to have 10GW of BESS projects across the UK and Europe by 2030. Fidra Energy has a 3.15GW development pipeline in the UK. The largest of these projects is the 1.45GW Thorpe Marsh project, set to begin ...

The evolution of UK BESS from the sub-50-megawatt (MW) template of a few years ago into some of the world's most ambitious projects. Challenges of co-locating systems alongside renewable power generation assets. How new BESS planning guidance in the UK is prompting the re-evaluation of project risk and design.

Over recent years, it has become common for utility-scale solar projects in Australia to include a grid-scale battery energy storage system (BESS) to provide energy generated by the solar farm to the grid outside of the times when the sun is shining. The uptake of BESS in New Zealand is particularly important given that it can help to solve one of New ...

The Ferrybridge BESS project is the second project for SSE Renewables. SSE is currently developing a 50MW BESS site at Salisbury that is expected to become operational by the end of 2023. In addition to the Ferrybridge BESS project, SSE Renewables has also secured permission for battery storage projects at

Fiddler's Ferry (150MW) and Monk ...

Atlantic Green has selected Ameresco and Envision Energy for the construction of a 300MW/624 mega watt hours (MWh) battery energy storage systems (BESS) project in the UK.. Called Cellarhead, the project is poised to enhance the UK's energy security and reliability by connecting to the National Grid's Cellarhead sub-station in the West Midlands region of England.

RAZLOG, Bulgaria--BUSINESS WIRE--Stationary battery manufacturer Hithium has successfully deployed the largest battery energy storage system (BESS) project in Eastern Europe to date, with a capacity of 55MWh. This solar plus storage project was realized completely by EPC company Solarpro, in Razlog, Southwestern Bulgaria, where the project is located.

The Razlog BESS project sets a precedent for the future of the renewable energy sector in the region and highlights the key role that Kehua's top-of-the-line PCS innovations and Solarpro's ...

Construction will commence in New Zealand on the country's biggest battery energy storage system (BESS) project so far in July this year, with the 35MW system expected to be commissioned in December.

The project is the largest BESS in the UK to enter the construction stage that Energy-Storage.news is aware of, and a senior director at another UK developer agreed with this. Larger projects, such as an 800MWh ...

SSE has acquired the rights from UK company Low Carbon for the development of a 120MW/240 megawatt hours (MWh) grid-scale battery energy storage system (BESS) project in Ireland's Midlands.. The move by SSE Renewables, a branch of the Financial Times Stock Exchange-listed SSE, is part of its strategy to grow its battery storage portfolio in the country.

The solar element of the project will comprise of 140,000 single axis tracking modules and 13 inverters across and a co-located battery energy storage system (BESS). Nick Keeler, Country Manager for Ethical Power Development New ...
