Known for its natural landscapes and high quality of life, New Zealand has become a prime destination for modular homeowners. Modular homes are a great building alternative in New Zealand, not only because they offer an affordable solution compared to traditional building, but also because many companies are currently investing in the research of modern solutions.

Oceanex Energy is an Australian company led by experienced Australian founders and international partners, progressing the development and construction of up to 5 offshore wind farms off the coast of Australia.

The original settlers of New Zealand, the Maoris, who arrived around 800 years ago from the central Pacific, used the natural geothermal springs for bathing and the very hot springs and geysers for cooking. Now the country uses this natural energy to supply around three per cent of its power needs, and is seeking to further develop its potential.

Geothermal power development in New Zealand first began in the mid-1950s, and there is the potential for the supply of up to ten per cent of the country's power needs. New Zealand already has over 300 MW of installed geothermal capacity. In recent years, deregulation of the power industry has encouraged further development, and two new plants entered ...
