

New energy storage company franchise conditions

What's going on with energy storage?

Industry Insight from Reuters Events, a part of Thomson Reuters. Tax credits and soaring demand in California and Texas are spurring developers to install bigger batteries, retrofit solar plants and build on disused coal plants. The Biden administration's Inflation Reduction Act has catalysed energy storage development across the United States.

Will a tax credit be available for energy storage projects?

However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.

Should energy storage be required in Texas?

California has mandated utilities to install energy storage while in Texas surging solar capacity has improved the business case for storage and developers benefit from faster grid connection and permitting than in many other markets.

What is long duration energy storage (LDEs)?

As renewable energy penetration grows, the demand for long duration energy storage (LDES) will rise. A range of different technologies are being developed to provide storage for several hours or longer, or store power between seasons.

How does the inflation Reduction Act affect energy storage?

The Biden administration's Inflation Reduction Act has catalysed energy storage development across the United States. Rising solar and wind capacity is increasing the need for battery storage and the inflation act includes investment tax credits (ITCs) for stand-alone storage facilities for the first time.

Is Tesla Energy a good energy storage company?

Tesla Energy's energy storage business has never been better. Despite only launching its energy storage arm in 2015, as of 2023 the company had an output of 14.7GWh in battery energy storage systems. Its portfolio includes storage products like the Powerwall and the Megapack.

Including Tesla, GE and Enphase, this week's Top 10 runs through the leading energy storage companies around the world that are revolutionising the space. Whether it be energy that powers smartphones or ...
