

How much money will Oslo bring to the project?

The City of Oslo and the companies will bring up to 6 billion NOK (620 million EUR) to the table, said Raymond Johansen. This amount is necessary for the project to be fully funded. The Norwegian state has already given a funding guarantee of 3 billion NOK (310 million EUR).

How much CO2 does Oslo emit a year?

The waste-to-energy plant at Klemetsrud is currently responsible for 17 per cent of the city's emissions, and is the biggest single emitter of CO2 in Oslo. From 2026, up to 400,000 tonnes of CO2 will be captured each year. This corresponds to the annual emissions from 200,000 cars.

How can a new project benefit from safe storage?

Safe storage is supported by monitoring programmes and reservoir simulations that new projects can benefit from. The Storage Directive (European Parliament and Council Directive 2009/31 /EC on the geological storage of CO) is the legal framework for environmentally safe storage of CO within the EEA.

The waste-to-energy plant at Klemetsrud is currently responsible for 17 per cent of the city's emissions, and is the biggest single emitter of CO2 in Oslo. From 2026, up to ...

A schematic of how Photocycle envisions its full system when installed at a house. Image Credits: Photocycle "Lithium-ion batteries use costly metals. Our material is super cheap: To store ...

Technip Energies (PARIS: TE) has been awarded a large (1) Engineering, Procurement, Construction (EPC) contract by Hafslund Oslo Celsio, the largest supplier of district heating in ...

· Fortum Oslo Varme's carbon capture and storage (CCS) project has made it through to the shortlist of candidates for financing from the EU's EUR1 billion Innovation Fund · The European ...

People that previously worked in the oil and gas industry are currently moving on to more renewable and green sources like solar power, batteries, offshore power, carbon capture and storage, and hydrogen. We are rapidly becoming large in ...

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel Murtagh. News ...

Energy storage is at the heart of energy transition - powering the move to a renewable future for industry and ending fossil fuel dependency. ... Belgium, our project with Avery Dennison went into operation in 2023. 2,240 parabolic ...

Longship is a full-scale carbon capture and storage (CCS) project that will demonstrate the capture of CO₂ from industrial sources, as well as transport and safe storage of CO₂. CO₂ will be captured at Heidelberg ...

An interesting project in this direction is called "Innovative hybrid energy system for stable power and heat supply in offshore oil and gas installation,"³⁹ which aims to combine ...

Technip Energies wins Norwegian carbon capture engineering contract potentially worth up to \$50 million. Great expectations: Hafslund aims to capture 400,000 tonnes per annum of carbon dioxide ...

Technip Energies has been awarded a large EPC contract by Hafslund Oslo Celsio, the largest supplier of district heating in Norway, for a world-first carbon capture and storage (CCS) project at waste to energy plant ...
