

The collaboration between IBM and UNDP brought about the enhancement of the UNDP GeoHub with the development of two new energy models. Laurel Patterson, Head of the UNDP SDG Integration Team, UNDP ...

Based on current price trajectories and a patent activity level of 444 patents per year using our model, battery prices will fall from 2016 to 2020 by 39%, which puts utility-scale ...

In addition, in the improvement of the "new energy + energy storage" project, adding a "sharing model" has become one of the ways to implement new energy power generation projects for new energy storage, and ...

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil ...

1. Introduction. In order to mitigate the current global energy demand and environmental challenges associated with the use of fossil fuels, there is a need for better energy alternatives ...

Exploring different scenarios and variables in the storage design space, researchers find the parameter combinations for innovative, low-cost long-duration energy storage to potentially make a large impact in a more ...
