

What is the Collie battery energy storage system (cbess) project?

In line with the WA State Government's decarbonisation strategy to be delivered by 2030,our Collie Battery Energy Storage System (CBESS) Project forms part of Synergy's decarbonisation strategy. Coal-fired power generation is being replaced with renewable energy generation infrastructure and energy storage solutions.

Why is Neoen building a big battery project in Collie?

In addition to the government-owned storage systems,Neoen is building a big battery project in Collie. The big batteries will be a significant energy infrastructure for the South-West's electricity grid,working towards WA's cleaner,reliable and affordable energy future.

What is the Collie battery project?

May 2023 - Collie Battery project announced,and community consultation commenced. Batteries support increased amounts of renewable energyin WA by providing grid services,such as storing renewable energy and discharging it at times when it's needed most.

How much did synergy pay for the Collie Bess?

Synergy has awarded SCEE Electrical a \$160 millioncontract for the main works of the Collie BESS,including civil,electrical and major equipment installation works. The WA Government announced that construction had commenced on the project,which is scheduled for completion by the end of 2025.

Is synergy developing a 500 MW battery in Collie?

Synergy,a WA Government State-Owned Corporation,is developing a 500 megawatt (MW) /2,000-megawatt hour (MWh) battery at a site in Collie. The project is separate to the 219 MW /877 MWh Collie Battery,also being delivered in Collie.

Where is the site in Collie?

The site is located in the Shire of Collie and as indicated by the South West Aboriginal Land and Sea Council website; it sits within the Gnaala Karla Booja Land Use Agreement Area. The site is zoned Rural under the Shire's Local Planning Scheme No. 6 and is adjacent to the Coolangatta Industrial Locality.

Collie Battery Energy Storage System (CBESS) Project is a 1GW/ 4GWh battery project being developed near the town of Collie in Western Australia (WA). The project is planned to be developed by renewable energy ...

The first batteries have been installed at state-owned Synergy's 500MW/2,000MWh Collie battery energy storage system (BESS) in Western Australia. In an update made today (8 October), the first 80 units have been ...

Western Australian government-owned utility Synergy has installed the first 80 of 640 containerised battery units assigned to its Collie battery energy storage system, located 16 kilometres northeast of coal mining ...

Collie Battery is Neoen's first 4-hour long duration battery & its first major project in Western Australia. The project has development approval for 1 GW / 4 GWh. Collie Battery is currently being built in stages, two of which are currently ...

Battery energy storage systems (BESS) can absorb excess energy generated by rooftop solar PV systems when the sun is shining and discharge when demand for electricity peaks usually in the evening. CBESS will be Synergy's third ...

In addition to the government-owned storage systems, Neoen is building a big battery project in Collie. The big batteries will be a significant energy infrastructure for the South-West's electricity grid, working towards WA's cleaner, reliable ...

the Collie battery project will ensure the security and reliability of WA's energy system. Credit: Synergy. ... Collie BESS, WA's largest grid-connected facility, is scheduled to ...

In September, supply contracts for Synergy's Collie BESS and 200MW/800MWh Kwinana 2 BESS projects were announced, with CATL supplying its EnerC containerised lithium iron phosphate (LFP) BESS solution to both projects and ...
