In this lighthouse project that ran from 2014-2017, Nordic Innovation worked closely with the Nordic countries to develop a single Nordic digital market and support innovative digital solutions that will improve the life of citizens and the effectiveness of doing business in the region.

The Nordic countries are often trail blazers, and lead the way in transforming healthcare to meet the challenges of the future. Due to a well-developed and well-organised health and welfare system, the Nordic region is able to offer tailored and innovative welfare solutions both in hospitals, care facilities and homes.

Replace the battery with the exact same type of coin-cell battery. Dell desktops use CR2032 coin-cell battery (see the markings on the battery). See the documentation of your Dell desktop for model-specific information. Removing the CMOS battery erases the BIOS settings; Ensure to replace with a brand new battery. Do not install a used battery.

The Nordic countries, especially Norway and Iceland, have taken major steps towards electrification of the transport with battery electric vehicles (BEVs). However, little has happened regarding larger vehicles as battery solution still are not able to provide heavy-duty users (such as buses, trucks and lorries) the mobility they need.
