

What is the role of the cabinet in North Korea?

The Cabinet, as the executive branch of the North Korean state, is responsible for implementing the state's economic policies, as guided by the Workers' Party. The cabinet is not responsible for defense and security issues, as those are handled by the State Affairs Commission.

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, "North Korea's Energy Sector," is a compilation of articles published on 38 North in 2023 that surveyed North Korea's energy production facilities and infrastructure.

How does North Korea generate electricity?

In 2017, North Korea generated 55 percent of its total electricity from hydroelectric plants and the remaining 45 percent from fossil fuels, signifying a national reliance on renewable energy. However, North Korea still favors coal as a major export commodity and overall energy generator for its economy.

Will North Korea's solar energy projects be successful?

North Korean media outlets have also claimed that the country's Solar Heating Equipment Distribution Agency plans to develop new technology and products using solar energy across the country, but it is unclear how successful and far-reaching these projects will be given North Korea's financial limitations. International Front

Does North Korea have energy problems?

A History of Problems North Korea's energy problems--and the state's promises to fix them--are almost as old as the country itself. After the liberation of the Korean Peninsula from Japanese colonialism in 1945, the northern half of the peninsula relied on its abundant water resources to generate electricity.

Is North Korea pursuing energy-producing alternatives to sanctioned resources?

The pursuit of energy-producing alternatives to heavily sanctioned resources, such as coal and oil, has been a central focus of North Korean economic policy under Kim Jong Un since he assumed power in 2012.

North Korea may want to shift away from heavy reliance on Beijing for energy production, but it is still far from obtaining the necessary expertise, technology, and capability to...
