

Will Puget Sound Energy develop a next-generation nuclear energy facility?

RICHLAND, Wash. - Energy Northwest today announced an agreement with Bellevue-based Puget Sound Energy to accelerate the agency's program examining the feasibility of developing and deploying a next-generation nuclear energy facility.

What is the Goldendale energy storage project?

The project would infuse \$2B+ dollars into rural Washington and generate millions of dollars in annual taxes for Klickitat County to fund schools, police and fire departments, roads, playgrounds, libraries and other infrastructure. [Learn More](#) Our number one priority is the safe construction and operation of the Goldendale Energy Storage Project.

Are nuclear energy technologies ready for commercial use?

New nuclear energy technologies, such as advanced small modular reactors, are approaching commercial readiness and feature enhanced safety systems; simplified, standardized, and scalable designs; and the ability to both swiftly integrate with renewables and provide around-the-clock electricity - without producing any greenhouse gas emissions.

The independent power producer announced this week that it acquired a 199-megawatt, 796-megawatt-hour standalone battery energy storage project in early-stage development in Marion County, part of ...

- The U.S. Department of Energy (DOE) today announced the beginning of design and construction of the Grid Storage Launchpad (GSL), a \$75 million facility located at ...

The Grid Storage Launchpad (GSL) is a \$75 million national grid energy storage research and development (R&D) facility on the Pacific Northwest National Laboratory (PNNL)-Richland campus (located in Richland, Washington).

A draft review for the Goldendale Energy Storage Project, the region's largest proposed pumped storage project intended to store excess energy like a battery, is open for ...

The Goldendale Energy Storage Project is a cornerstone of both Washington's and the broader Pacific Northwest's clean energy economy. It will provide quality jobs and rural economic development while helping Washington and the ...

The BrightNight Greenwater Storage Project will feature a 200-megawatt (MW) / 800 MWh Battery Energy Storage System (BESS), situated in Pierce County, Washington. This innovative solution will be capable of discharging a firm ...

Acquires 599 MW of solar and energy storage development projects in New York, Idaho and Oregon ; Expands into Pacific Northwest US markets with growing demand and future development opportunities ... include ...

The Grid Storage Launchpad (GSL) is a \$75 million national grid energy storage research and development (R& D) facility on the Pacific Northwest National Laboratory (PNNL)-Richland campus (located in Richland, Washington). The ...

So, pumped-storage has been around for a long time, but new pumped-storage, there are several pumped-storage projects in the Northwest that are currently in the permitting process. ... who ...
