

Who is Offgrid power solutions?

Welcome to Offgrid Power Solutions! We're a family run business that have been involved in outdoor activities for generations. Growing up in Africa, we've visited some of the most remote places on Earth, which has led us to pursue the passion of creating Offgrid Power Solutions!

Can you design an off-grid power system?

Alternatively, our friendly off-grid experts are happy to help you design your off-grid power system. Having tested 30 different makes of wind turbines, we chose the Leading Edge LE-300 horizontal wind turbine to power its off-grid LED street lights and communication solutions.

What types of off grid solutions do you offer?

Our range of Off Grid Solutions includes EasyGrid - a plug and play hybrid solution for homes and businesses looking for a straightforward, affordable way to generate their own power and Containerised systems - robust, semi bespoke systems ideal for isolated projects. We work with off grid power for a variety of sectors including:

Are off-grid energy systems reliable?

Off-grid energy systems are excellent and reliable in outage situations and are dependable should potential disasters strike. We are experts of out of the box thinking when it comes to renewable energy, particularly when there is no grid available or limited availability.

Why do companies need an off-grid system?

Across all markets companies are looking to reduce their operating costs to remain competitive, by installing efficient off grid systems companies can lower their fuel bills, enjoy lower capital start up costs, and purchase power that is mobile, adaptable and expandable.

Do construction sites need off-grid power?

Often construction sites and quarries have no mains power nearby - even if they do, an intermittent supply means a reliable off-grid power solution is needed. The LE-300 wind turbine is renowned for its reliability and robustness, ensuring it continues producing power even during storm force winds.
