

Where is solar Fiji located?

Lot 41-42 Pilling Road, Nasinu, Suva. Solar Fiji, supply and install the highest quality solar power systems in the South Pacific. Based in Nasinu, Suva, we specialize in Off Grid and Grid Connect Solar Power Systems and are official distributors of world leading brands such as Victron Energy, Canadian Solar, Narada Batteries and QCells.

Should you build an off-grid Solar System?

For those who live in isolated areas that lack the infrastructure, off-grid solar might be a necessity. Going off the grid means you keep all the power you generate, and there's no interruption in service when the power grid fails. However, you are going to have to take some things into consideration if you plan on building an off-grid PV system.

Is solar Fiji a good company?

The technician (Pita) was professional when he came to install our solar system. The system is good. Products are good and quality. Installation team did a good job. I am happy with the solar system. Company is good and original. Customer service very good. Installation team did good job. I am happy with the solar system provided by Solar Fiji.

Why should you buy an off-grid Solar System?

Our innovative technologies make solar possible for households, businesses, property owners and entire communities. Anyone can generate and store reliable power. Lower your utility bills by generating your own electricity. Do you know how to evaluate, size, and buy an off-grid solar system?

Why should you choose Ves solar energy in Fiji?

VES employs the most experienced renewable energy experts in Fiji. Our team will recommend a solution to best meet your unique situation. In an effort to modernize the solar energy infrastructure in Fiji, our team has established strong partnerships with the most advanced technology manufacturers worldwide.

What components do I need for an off-grid Solar System?

Below is a combination of multiple calculators that consider these variables and allow you to size the essential components for your off-grid solar system: The solar array. The battery bank. The solar charge controller. The power inverter. Simply follow the steps and instructions provided below.

Choosing the Right Size Off Grid Solar System. You will need to size your solar system so that it can produce enough power to cover your winter and summer needs, which often means most of the year you will be producing more power than you can use. Additionally, we need to account for the fact that solar systems are not 100% efficient.

Off-grid solar systems with battery storage are ideal for locations without access to the electrical grid. However, compared to grid-connected systems, off-grid solar power systems are expensive. Therefore, system ...

Off-Grid Source is the premier destination for off-grid power solutions. Shop solar kits, portable power stations, batteries, and more from leading brands. ... Solar Panel Array Size: How big your solar panel setup should be. Battery Size: How much battery storage you need. Inverter Size: ...

By adding these energy-saving steps, you'll cut down your energy use. This makes your off grid solar system work even better. It's a smart way to get the most out of your off grid solar power systems and off grid solar. Conclusion. Getting the right size for an off-grid solar system is key. It ensures your system meets your energy needs and ...

By considering factors like power consumption, peak load, solar system efficiency, and generator compatibility, you can determine the appropriate generator size for your off-grid solar system. Proper sizing not only prevents overloading but also ensures a dependable power supply during high-demand periods and unfavorable weather conditions.

How to size an off-grid solar system Calculate Energy Usage: Assess the total daily energy consumption in watt-hours (Wh) or kilowatt-hours (kWh) based on the electrical loads in your home. This can include lighting, appliances, electronics, and ...

If sizing an off-grid solar system, consider moving these loads, or at least most of them, to propane. In some cases, like the boiler and water heater, solar thermal can be an excellent option. Smart Controls - Basic, smart home controls can make a big difference in the size of a solar system. We're not talking about fancy controls, just ...

BatteryEVO OFF-GRID SOLAR SIZING TOOL Calculate My System Size BatteryEvo's Off-Grid solar sizing tool can help you ESTIMATE what your system needs would be. This tool is intended to provide you very basic sizing estimations and doesn't take into consideration the many factors specific to your installation. Factors such as shading, roof pitch, azimuth (direction

Using your daily energy usage and Peak Sun Hours, and assuming a system efficiency of 70%, the calculator estimates the Wattage required for your off-grid solar system's solar array. Off Grid Solar Panel Array ...

Solar Fiji supplied and installed a 1760W Trina solar panel system for a home in Namacu, Koro, Fiji Islands. The solar system will generate an average of 1.76kWp, and the inverter is capable of powering items such as LED lights, TV/DVD/Radio, medium fridge or medium deep freezer, computer, mobile phones, fans and other small electrical items.

Solar Fiji engineered, supplied and installed a 24.75kWp JA Solar system with 57.6kWh Narada Tubular Gel

battery storage, for Ministry of Fisheries Rabi Island, Fiji, Fiji Islands. Overview: 75kWp of PV using 24.75kWp JA Solar 330W Modules and is DC coupled by 5 Victron Smart Solar Charge Controllers 250/100.

Commercial Victron off Grid Solar System for Ministry of Fisheries Rabi Island, Fiji; Grid Connect Solar System for Phama Plus and Road King Farms in Taveuni, Fiji Islands; Commercial 3-Phase Victron Off Grid Solar System in Namosi, Fiji; Commercial Victron Off Grid Solar System for Vatulutu Resort, Fiji; Our First Hybrid Solar System in Tuvalu ...

Solar Fiji engineered, supplied and installed a 24.75kWp JA Solar system with 57.6kWh Narada Tubular Gel battery storage, for Ministry of Fisheries Rabi Island, Fiji, Fiji Islands. Overview: 75kWp of PV using ...

Lighting and communications are our main priority followed by construction. Unfortunately my sewing machine and iron are not supported by our very basic off grid power solutions at the moment. That's not to say that's the way it's going to be for the long term. Currently we have a basic solar system with one solar panel and a 12 volt battery.

Sizing Your Off Grid Solar System - A Step-By-Step Guide. Firstly, determine your daily energy consumption in kWh. Next, divide this figure by your location's daily peak sun hours to find the system size in kW. This will tell you how much kilowatt-hours (kWh) your solar system should produce per day.

Solar Fiji engineered, supplied, and installed a 1760W Jinko solar panel system for a house in Vadravadra Villiage, Gau Island, Fiji. The solar system will generate an average of 1.76kWp, and the inverter is capable of powering a modern home, including air conditioning.
