

Old metal telecom rack doesnt stand up electricitys

This type of 19" rack, solid and strong, is limited with only two mounting posts not the standard four (ie typical server cabinet). I also have two steel shelves that I can move up or down for a ...

So static electricity is an electric charge that doesn't move around. Plastics and fabrics and other insulators (opposite of conductors like metals and graphite), don't have many delocalised ...

Out of human compassion, maybe a little. Beyond that, the occasional reminder that as a human adult he needs to stand up for himself is all I'd do, lest I get sucked up into someone else's ...
