

Who owns Block 6 oil & gas concessions in Oman?

In addition to Hydrom, EDO owns 60% of the Block 6 oil concession and 100% of the Block 6 non-associated gas concession. The Petroleum Development Oman (PDO) was responsible for roughly 64% of the country's oil reserves at the end of 2021, according to the MEM's 2021 annual report.

How can Oman improve its oil production?

Improvements in Oman's capacity and efficiency - such as enhanced oil recovery techniques, including the use of solar steam to extract oil from deposits located deep underground instead of natural gas - are expected to let it allocate more resources for higher value segments.

Are private companies entering Oman's hydrocarbons sector?

Indeed, private companies are increasingly encouraged to enter Oman's hydrocarbons sector. The contracts utilised in this space are concluded in the form of exploration and production sharing agreements (EPSAs).

What does the MEM do in Oman?

Al Aufi is tasked with overseeing efforts to help Oman advance its goal of creating a less carbon-intensive future. In addition to hydrocarbons, the MEM also oversees renewable energy and industry development. Oman aims to be a leading producer and exporter of hydrogen made using electricity generated by renewable sources.

How will Oman's natural gas supply impact industrial growth?

Oman's reserves of natural gas are set to play a leading role in fuelling the country's industrial growth in the coming years, as processes that currently use fossil fuels begin to switch to green hydrogen, allowing Oman to step up exports of its surplus gas as liquefied natural gas (LNG).

How much energy will Japan buy from Oman in 2022?

In December 2022 Japanese companies - including Mitsui & Co, ITOCHU Corporation and JERA - secured a deal to procure an additional 2m tonnes per year from Oman over 10 years starting from 2025 as Japan seeks to lock in long-term contracts to shore up its energy security.
