What is Orenge power?

ORENgE power systems are installed in smart buildings, EV transportation, and outdoor applications to overcome mainstream carbon footprint limitations caused by the inefficiency of traditional grid and AC power conversion. ORENgE aims to produce the greenest alternative to current environmentally toxic renewables.

What is Orenge onsite power?

ORENgE allows for the installation of the ultimate ORENgE onsite power solution within the real estate market for Paris Accord and US Climate 21 carbon reduction.

What makes Orenge unique?

ORENgE provides an earth-abundant and low CO2 emitting source of energy worldwide, with unsurpassed sustainable and renewable attributes of generating power from light and power delivery through intelligent technology integration.

How does Orenge support sustainability?

ORENgE products support sustainability by using materials that are abundant, recyclable and non-toxic. ORENgE power systems are installed in smart buildings, EV transportation, and outdoor applications to overcome mainstream carbon footprint limitations caused by the inefficiency of traditional grid and AC power conversion.

Is Orenge eco-friendly?

ORENgE is the greenest option among all alternative, renewable power sources due to its printing production process and the organic materials used. To make ORENgE, GO-OPV uses rollable film that is made up of eco-friendly materials (fullerene and non-fullerene-based inks) as well as recyclable earth-abundant materials.
