

Oslo direct sales of energy storage vehicles

Is Oslo a good place to buy electric cars?

Today, Oslo is the world's first mass market for electric vehicles. You will not find a higher density of electric vehicles (EVs) anywhere else in the world. More than 50% of all new cars sold in Oslo in 2017 were electric. In 2018, the number increased to more than 60%. This means that more than every second car sold is now an EV.

How many electric buses are there in Oslo?

Oslo's public transport operator, Ruter, has started using electric busses, and plans for 200 vehicles as part of its fossil-free strategy. Ampere was the first Norwegian full-electric road transport ferry, and around 70 additional electric ferries are coming into use in the Norwegian fjords over the coming years.

What can we learn from the EV capital Oslo?

There are several lessons learned from the EV capital Oslo, including: Green taxes are working. People will make green choices if they can afford it. A green tax on petrol and diesel cars combined with tax exemptions for zero emission vehicles gives a double incentive to buy electric cars.

Should Norway buy electric cars?

Norway's EV policies were now championed as a centerpiece of the national effort to slow climate change in an economy whose electricity is already clean, produced largely from hydropower. "We want people to buy electric cars," Norwegian Prime Minister Erna Solberg said in 2019.

Will all Oslo buses be electric by the end of the year?

All city buses will be electric by the end of the year. Oslo is also targeting construction, the source of more than a quarter of its greenhouse gas emissions. Contractors bidding on public projects have a better chance of winning if they use equipment that runs on electricity or biofuels.

Is Norway ready for a net-zero energy transition?

(Photo by Sean Gallup/Getty Images,) Rapid changes in the Norwegian car market provide a glimmer of hope for a rapid energy transition to net zero. The net-zero pathway from the International Energy Agency (IEA), published in May 2021, suggests that by 2030, 60% of new car sales should be BEVs - a milestone Norway has already passed.

In March 2019, 76% of all new cars sold in Norway's capital city, Oslo, were electric vehicles (EVs) and the world largest plug-in hybrid ferry with capacity of 2,000 passengers will start ...

Electric vehicles (EVs) of the modern era are almost on the verge of tipping scale against internal combustion engines (ICE). ICE vehicles are favorable since petrol has a much ...
