Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Rune, Head of Battery Norway.

Is Norway a good place to recycle batteries?

Norway, with its strong expertise in processing industry, has a great opportunity to take a leading role within recycling of batteries and developing new and more efficient processes for recycling of all battery materials. - Today, graphite is not recycled, and ends up as CO<sub>2</sub>-emissions.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstrøm was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.

How do I deliver to Oslo battery days?

All deliveries before the event must be to this address: Grand Hotel, Arbeidergaten 4, 0101 OSLO Norway. Everything must be marked: "Oslo Battery Days" and "your company name"; To be delivered in Oslo, not earlier than one week before the event. Exhibitor, will there be electricity available? You will have access to AC outlet close to your table.

Are EV batteries the future of energy storage?
