

Oslo energy storage vehicle after-sales service

Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Rune, Head of Battery Norway.

Is Nio opening a delivery and service center in Oslo?

In September, the Chinese automaker plans to open a delivery and service center in Oslo as well. Then in 2022, NIO plans to expand its after-sales service network in Norway nationwide. As part of its premium service experience, NIO offers mobile service and car pickup-and-delivery services.

Is Norway phasing out sales of Li-Cycle's EVs?

Norway is on the path of phasing out sales of new internal combustion engine vehicles by April 2022. Li-Cycle, through this vehicle, will construct a new commercial lithium-ion battery recycling facility in southern Norway.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.

Are EV batteries the future of energy storage?

"There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Rune, Head of Battery Norway. An early adopter of electric transport, Norway continues to capture EV battery headlines.
