Pakistan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO_2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Pakistan"s energy needs rely heavily on locally produced and imported crude oil. COVID-19 caused a huge decline in local oil demand in 2020 following an economic downturn, but as the economy rebounds there is an uptick in demand for oil as well. With historically high global oil prices, the import bill for Pakistan saw a significant increase ...
