

The Island Times, a Palau publication, reported last week that the contract between PPUC and the independent power producer sets the purchase price of solar energy at 14.25 cents/kWh, higher than the current fuel cost. "This translates to a \$4 increase for a typical household consuming 100 kWh monthly, with their bill rising from \$34 to \$38 ...

ENGIE eps is building what's billed as the world's largest, solar power-energy storage microgrid for the government of Palau. With 100 MW of power generation and distribution capacity, the Armonia microgrid will enable Palau to meet its 45%-by-2025 renewable energy goal five years ahead of schedule, as well as offer electricity at the lowest rates in Palau's history, ...

The latest Tracking SDG7 report of 2023, shows that about 40% of Sub Saharan African (SSA) countries do not have official electrification plans and only about 22% have set electrification targets at least as ambitious as SDG indicator 7.1.1. This raises concerns about the efforts towards universal access goals. Besides, West Africa emerges as the second-largest region in ...

Following the three-day Energy Summit last week, Palau signed a partnership with EarthX and Grid Market, two organizations that will help the country transition to cleaner energy by 2025. [restrict] Earthx is a nonprofit organization that promotes a positive impact on the environment through education, events and curating a public platform for ...
