

How do solar panels work in Israel?

Israel only allows on-grid systems, which means you must approve connecting your solar panels to the electric grid in your area. Your electricity bill is calculated by how much electricity you consume and the monthly output from your solar panels. What's the process to get solar panels on my roof?

How to set up solar panels in Israel?

When setting up solar panels, the first step is contacting a company that installs solar systems. Today in Israel, there are many companies of this type in the growing market, and it is worthwhile to conduct thorough market research and get recommendations from others who have already been through the process.

Are solar panels profitable in Israel?

While the system can bring a double-digit return on investment for some, for the hundreds of thousands who own apartments in shared buildings, it is not yet profitable. Over the past few years, it has become more and more popular for homeowners in Israel to set up solar panels on their roofs or in their yards -- and for good reason.

What makes Sela #1 for solar panels in Israel?

That's what makes Sela #1 for solar panels in Israel. Who is Sela? Reliability. Professionalism. Integrity. Founded in 2009, Sela has earned a sterling reputation as an industry leader in its field. Sela is the company of choice for business owners looking to monetize their commercial rooftops and private homeowners looking to save on electricity.

Should Israel use solar panels?

Another advantage to expanding the use of solar panels is that it reduces Israel's dependence on oil-produced energy, which in today's world affords great power to a fairly small number of countries, most of which are characterized by problematic regimes, to say the least.

Can a solar power plant be installed on a roof in Israel?

In order to meet Israel's goal of increasing the production rate of green energy to 30% within a decade, the State is promoting legislation that allows owners of private homes and commercial buildings to set up a solar power plant on the roof.
