

Does Panerai have a power reserve?

The watch is powered by a special version of Panerai's in-house automatic Caliber P.9010 movement called the P.9010/EL. It has two mainspring barrels (in addition to the four barrels for the light system) providing a full three days of power reserve.

How do you know if a Panerai has a power reserve?

The outline of the small seconds counter at 9 o'clock also glows, as does the pip on the unidirectional bezel. Finally, there's a linear power reserve indicator for the light that also illuminates. It looks like a life meter in a fighting game and tells you at a glance how much light you've got left. A little Panerai ASMR.

How rare is the Panerai PAM01800?

The PAM01800 is also an exceptionally rare watch. The first Submersible Elux LAB-IDs will make their way to wrists this October, with Panerai planning only 150 examples of the watch in total, to be released in batches of 50 over the next three years.

Does Panerai use a four-patent system?

With an innovative 30-minute power light feature, this latest release from Panerai uses a four-patent system. Over the years, Italian watchmaker Panerai has garnered an impressive reputation for delving into its extensive back catalog and releasing watches that are inspired by its deep history of innovation.

Is Panerai a water resistant watch?

It has an impressive water resistance of 500m and its case and bezel are made from Ti-Ceramitech, Panerai's new ceramized titanium material that's 44 percent lighter than stainless steel and ten times harder than ceramic. The material debuted just two months ago at Watches and Wonders.

Is the submersible elux lab-ID a Panerai?

This couldn't be further from the truth. The Submersible Elux LAB-ID is 100 percent a Panerai. The watch is an absolute beast, even by the brand's oversized standards. It measures 49mm across (without the crown) and a whopping 21.6mm thick.
