What is USAID Papua New Guinea electrification partnership activity (USAID-Pep)?

The USAID-Papua New Guinea Electrification Partnership Activity (USAID-PEP) is a five-year project (2020-2025) with the Papua New Guinea (PNG) government to significantly contribute to achieving the goal of connecting 70 percent of PNG's population to electricity by 2030.

How many people in PNG have electricity?

In the early 2000s, less than 10 percent of PNG's population had access to electricity. In recent years, the PNG government announced an ambitious target to accelerate progress - 70 percent of its people will have access to reliable electricity by 2030.

Is there wind power in PNG?

A recent study by the International Finance Corporation highlighted the enormous potential for wind power in PNG. There are multiple locations in and around Port Moresby and coastal villages of PNG with wind speeds over 10 meters-per-second.

What is the USAID electrification program in PNG?

The United States has launched its PNG Electrification Program committing US\$60 million over five years and plans to make 200,000 electrical connections. Rather than fund all its projects entirely, USAID aims to use seed funding to leverage private sector investment into PNG's electricity sector.

How does ESG provide market intelligence in PNG?

ESG also provides market intelligence to the sector through the PNG Off-grid Market Intelligence Briefing newsletters and catalog of quality-verified stand-alone solar products sold in PNG with their respective manufacturers and distributors in the country.

Interview: Wapu Sonk. How will the energy sector prepare for the growing demand for liquefied natural gas (LNG)? WAPU SONK: Papua New Guinea is well known for its extensive and profitable gas fields. While our LNG reserves are lower than those found in Qatar or Mozambique, for example, we have a significant amount of discovered gas, and that allows us to play an ...

As part of ESG's support to the USAID Papua New Guinea Electrification Partnership (USAID-PEP) Activity, we're not only working to improve utility company operations throughout the country for on-grid power, but also focusing on those remote communities not connected to grid power.

Rising demand and a need to boost connectivity to the national grid are driving rapid expansion in Papua New Guinea's electricity sector, with a range of sources tapped to meet the government's power access targets. Currently, PNG has less than 600 MW of installed generation capacity, according to the Department of National Enterprises, and frequent

As a result, TotalEnergies and its joint venture partners are preparing to reopen bidding to a larger group of contractors, with offers expected in the second quarter of 2025. ...

Reducing reliance on energy imports and addressing the shortage of power is major goal for Papua New Guinea. To this end, the National Executive Council approved a draft of the PNG Natural Gas Policy White Paper in April 2018, which seeks to better manage the growing oil and gas industry, while deriving more benefits on the domestic front.
