

How is energy sourced in Paraguay?

Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

Is Hitachi a company?

Hitachi Energy Ltd. is a technology company headquartered in Zurich, Switzerland. The company's products include high-voltage equipment, transformers, and services for renewable energy. The company is a subsidiary of multinational conglomerate Hitachi Ltd.

Is Paraguay a good place to build a power plant?

The announcement made by ATOME Energy highlights the virtues of Paraguay as a location for its production centre. Easy access to clean energy from hydroelectric dams, as well as its participation in Mercosur, make it an ideal location for such a large-scale project.

Does Paraguay have a hydrogen policy?

Paraguay is still in the early stages of developing a hydrogen policy, with a specific focus on green hydrogen production. Paraguay does however have a strong focus on renewable energy and shows promise for developing a green hydrogen sector. Paraguay is a leader in renewable energy generation, particularly hydropower.

What services does Hitachi energy offer?

Hitachi Energy offers high-voltage switchgear and breakers, high-voltage direct current, transformers, substations, and power-system automation. Hitachi Energy has been involved in several notable projects, such as:

How much electricity does Paraguay produce?

Paraguay generated 51.8 terawatt -hours of electricity in 2004, while consuming only 3.1 TWh. Almost all of the country's electricity production comes from a single facility, the bi-national Itaipu dam. Paraguay is one of the world's largest net exporters of electric power.
