

The \$150 million deal includes financing structures akin to power-purchase agreements to allow customers to use Mainspring's units to replace on-site load served by the grid, as well as provide ...

Mainspring Energy's advanced technology provides a fast, affordable, equitable, and clean way to keep the pedal on growth, maintain reliability, and create optionality. With data centers in mind ...

and ammonia), can act as long-duration energy storage; Mainspring recommends amending the discussion of long-duration energy storage to specifically reference technologies that can store energy in the form of clean fuels. I I . D i s c u s s i o n A . L i n e a r G e n e r a t o r s A r e a S c a l a b l e , C o m m e r c i a l l y - R e a d y T e c h n o l o g y t h a t W i l l

Lineage has pioneered the use of linear generators for onsite power independence, sustainability, and cost control, with multiple deployments at its facilities in California and several Northeast U.S. states to date. In late 2021 Lineage announced its first cold storage facility to produce 100% of its energy consumption on-site, using rooftop solar and ...

Mainspring Energy Comments on Draft 2023 Integrated Energy Policy Report Description: N/A Filer: System Organization: Mainspring Energy Submitter Role: Public Submission Date: 12/1/2023 4:11:25 PM ... long-duration energy storage, back-up generation, behind-the-meter generation, renewable firming, electric vehicle

ABM (NYSE: ABM), a leading provider of integrated facility services, infrastructure solutions, and parking management announced a strategic partnership with Mainspring Energy, Inc., in which ABM will deploy Mainspring's cutting-edge Linear Generator technology to enhance electric vehicle ("EV") charging solutions for fleet, commercial, and ...

Mainspring Energy, Inc. Primary Authors. Baldomero Lasam . Project Manager . California Energy Commission. Agreement Number: PIR-17-006 . Kevin Uy. ... Lineage Logistics, the largest global cold-storage logistics company, and American Electric Power, a multi-state utility company focused on low-cost solutions for its

Mainspring generators improve energy independence and buffer our growing use of solar power, while offering the potential future use of zero carbon fuels like green hydrogen and others." ... The full dispatchability of Mainspring products allows them to easily integrate with onsite solar and energy storage, while following and matching power ...

MENLO PARK, Calif., June 22, 2022 -- In an important breakthrough towards a resilient, zero-carbon electric

grid, Mainspring Energy today announced that its Mainspring Linear Generator has passed key tests directly running 100% hydrogen and 100% ammonia fuels at high efficiencies.

The Mainspring Linear Generator provides data center owners and operators with rapid deployments of clean, reliable, and flexible on-site power. ... Obtaining carbon-free energy every hour, every day is challenging for data center operators who have committed to zero carbon 24x7x365. The dispatchability of the Mainspring Linear Generator and ...

Mainspring Energy looks quite impressive. They've matured this technology to the point where it's deployed in multiple locations near their base in California. They say their target market is anywhere a backup diesel generator would be used. They have another potential too, EV charging stations.

"Texas is the largest producer and largest consumer of energy in the U.S., and it's significant for Mainspring to move into this market with a customer as innovative as Lineage leading the way ...

MENLO PARK, Calif., May 24, 2022 -- Onsite power generation provider Mainspring Energy Inc. today announced that Lineage Logistics, the world's largest temperature-controlled industrial REIT and logistics solutions provider, has signed an agreement to deploy up to 150 Mainspring Linear Generators across its network of distribution facilities ...

PG& E is exploring greening those microgrids, trialling battery storage alongside mainspring linear generators that run on different types of gas. It is also, with gravity energy storage startup-turned BESS integrator Energy Vault, building a large-scale system that combines lithium-ion (Li-ion) batteries with a green hydrogen electrolyser.

The Mainspring Linear Generator delivers unmatched flexibility for the grid transition, including the ability to switch between fuels like hydrogen, ammonia, and biogas with software, and quickly track and firm renewables with its full dispatchability.

Mainspring Energy is revolutionizing power generation with the world's most flexible and adaptable onsite power generator, the Mainspring Linear Generator. Commercial, industrial, and utility leaders are choosing Mainspring over traditional options like engines, turbines, and fuel cells to quickly and reliably deliver local power for EV ...
