

How is energy sourced in Paraguay?

Energy in Paraguay is primarily sourced from hydropower, with pivotal projects like the Itaipu Dam, one of the world's largest hydroelectric facilities. This reliance underscores the need for a robust infrastructure, including efficient transmission networks and distribution systems, to leverage the country's renewable resources fully.

Does Paraguay have hydro power?

This page is part of Global Energy Monitor's Latin America Energy Portal. In 2020, hydro power provided 100% of Paraguay's electricity and roughly half of the country's overall energy supply, with biofuels and imported oil accounting for the remainder.

Will Paraguay develop more solar and wind power projects?

The country plans to utilize a mix of renewable energy sources going forward to diversify its energy mix and increase its energy security. While scarcely existent today, Paraguay hopes to develop more solar and wind power projects in the future.

What is the energy mix of Paraguay?

The energy mix of the Republic of Paraguay is dominated by clean energy sources, where hydropower accounts for the largest share of the country's power generation, representing around 99.5% of the installed power capacity.

Who regulates energy projects in Paraguay?

Permitting and regulation of energy projects is handled by the Viceministry of Mines and Energy. ANDE (Administraci3n Nacional de Electricidad) is the state-owned entity responsible for satisfying Paraguay's electrical needs through generation, transmission, and distribution. Paraguay does not have a national oil company.

Does Paraguay need to diversify its energy mix?

Paraguay sees the need to encourage the diversification of its energy mix through the adoption of renewable energy and net zero technologies.

SPARK, Reon's energy analytics application, combines process knowledge and plant data to analyze performance metrics and identify trends. Predictive analytics and planning allow site managers to proactively optimize plans, control performance of various equipment off-site, and predict site failures using historic models.

Pakistan - Karachi, March 31, 2022: Lucky Cement Limited and Reon Energy today announced a 34 MW captive solar power project with a 5.589 MWh Reflex energy storage.
