

What is a pay-as-you-go solar system?

In a “pay-as-you-go” (PAYG) business model, a company essentially rents consumers a solar home system that comes with a battery, a charge controller, a solar panel, LED bulbs and a mobile charger. Basic systems have enough power to charge phones and lights, and larger ones could power small appliances like radios or TVs.

Could pay-as-you-go solar bring affordable electricity to underserved people?

Without any other options, these citizens are forced to either go without power or use kerosene, an expensive and oftentimes dangerous fuel that pollutes the air and creates fire hazards. But there is a solution that could bring affordable electricity to unserved and underserved populations while growing the local economy: pay-as-you-go solar.

Are rentable solar systems a viable solution for Sub-Saharan Africa?

More than 600 million people in sub-Saharan Africa lack access to electricity; 71 million in Kenya and Tanzania alone. Rentable solar systems can provide a safe,affordable solution,but they haven't taken off - yet.

What is Azuri PayGo Energy?

Azuri PayGo Energy has combined solar and mobile phone technology to bring clean energy to people living in Sub-Saharan Africa. The pay-as-you-go solar home system provides eight hours of emission-free lighting each day and enough power to charge mobile phones.
